

A hand is shown hovering over a smartphone that is placed on a white MagPuck charging dock. The dock is connected to a power source via a cable. The smartphone screen displays a yellow lightning bolt icon and the text "76% Charged". The background is a blurred indoor setting with light coming from a window.

MagPuck Charging Mounting Options

With more and more wireless charging in the mix, you need solutions that play nicely with your existing power. MagStand and MagMount do just that. These streamlined metal supports neatly secure Byrne's MagPuck and other MagSafe charging pucks, keeping phones safely in place and your desktop clutter free. MagStand offers a freestanding design while MagMount easily affixes to the back of many popular Byrne products. Available in coordinating black and white finishes too. Just plug into any USB-C port and your puck is ready to charge in modern style. How's that for a little Byrne "Mag"ic?
